

Website Requirements

Dr. Parul Jangra — Dental Theatre

DOCUMENT TYPE	CLIENT	VERSION	DATE
Website SRS	Dental Theatre	v1.0	May 2026

PROJECT OVERVIEW

- Client: Dr. Parul Jangra, Dental Theatre — multi-location dental practice in Panipat.
- Scope: Design and development of a new website covering all clinic locations.
- Priority: Strong design with animations, patient-friendly UX, and automated follow-up integration.
- Reference style: Modern, professional dental/healthcare websites with rich visuals.

TECH STACK & PLATFORM

- Platform: To be decided by dev team — must support animations, WhatsApp API, and form/booking integrations.
- Mobile-first responsive design required across all pages.
- Google Business Profile setup for each clinic location (separate profiles, linked to website).
- WhatsApp Business API integration for appointment booking and automated messages.
- SEO-friendly architecture — clean URLs, meta tags, schema markup for local search.

REQUIRED PAGES

Home Page	Hero section, tagline, CTA to book appointment, quick links to services and gallery.
About / Doctor Profile	Dr. Parul's experience, qualifications, credentials, years in practice, personal story.
Services	List of all dental treatments offered. Each service with brief description. SEO-optimised.
Gallery	Photo gallery section — raw working photos of Dr. Parul at work, clinic interiors, procedures.
Testimonials	Patient reviews and testimonials. Can be static or integrated with Google Reviews.
Book Appointment	WhatsApp-based booking flow. Simple form + redirect or click-to-WhatsApp button.
Contact / Locations	All clinic locations with addresses, maps, phone numbers, and hours.

FUNCTIONAL REQUIREMENTS

FR-01	WhatsApp Appointment Booking Book Appointment button/CTA on homepage and service pages opens WhatsApp chat with pre-filled message. Must work on both mobile and desktop.	Must Have
FR-02	Automated Patient Follow-Up — Reminder System Receptionist enters patient treatment data (e.g. root canal completed, follow-up date). System triggers: (1) WhatsApp message on Day 3 reminding patient of Day 5 follow-up. (2) WhatsApp reminder day before the follow-up appointment.	Must Have

FR-03	SEO — Local Search Optimisation All pages must be SEO optimised. Local SEO for Panipat. Schema markup for dental practice, doctor profile, and each location. Google Business Profile integration for all three clinic locations.	Must Have
FR-04	Image Gallery System Dedicated gallery page with filterable photo categories (clinic, doctor at work, procedures, patient setups). Lightbox view on click. Optimised for fast loading.	Must Have
FR-05	Testimonials Section Testimonials displayed on homepage and a dedicated section. Option to pull from Google Reviews via embed or display manually uploaded testimonials.	Must Have
FR-06	Social Media Links All social media profiles (Instagram, Facebook, YouTube, etc.) linked from header/footer and from the About page.	Must Have
FR-07	Multi-Location Support Website must display all clinic locations clearly. Each location with address, map embed, phone number, and hours. Separate Google Business Profiles set up for each.	Must Have
FR-08	Animations & Motion Design Client specifically requested animation — entrance animations on scroll, smooth transitions between sections, animated hero section. Should feel modern and premium, not template-like.	Must Have
FR-09	Mobile Responsive Full mobile responsiveness across all pages and features. WhatsApp booking and gallery must work correctly on mobile.	Must Have
FR-10	Doctor Experience & Credentials Profile Dedicated section or page showing years of experience, qualifications, institutions, certifications, and any awards or recognitions.	Should Have
FR-11	Contact Form Standard contact form with name, phone, message. Submissions sent to clinic email or WhatsApp.	Should Have
FR-12	Google Maps Embed Embedded Google Maps for each clinic location on the Contact/Locations page.	Should Have

FR-02 · AUTOMATIONFLOWDETAIL

Patient Follow-Up Reminder — Logic

Step	Trigger	Action	Channel
1	Receptionist enters treatment record (e.g. Root Canal — 30 Apr)	System logs patient name, phone, treatment, follow-up date	Admin Panel / Website Backend
2	Day 3 after treatment	Auto message sent: "Hi [Name], your follow-up appointment at Dental Theatre is in 2 days on [Date]. Please don't miss it!"	WhatsApp
3	Day before follow-up	Reminder message: "Hi [Name], reminder — your appointment at Dental Theatre is tomorrow at [Time]. See you soon!"	WhatsApp

Note: Receptionist must have a simple data entry interface (admin panel or form) to log patient treatment and follow-up date. WhatsApp messages to be sent via WhatsApp Business API.

NON-FUNCTIONAL REQUIREMENTS

- Page load speed: Under 3 seconds on mobile (4G). Images to be compressed and lazy-loaded.
- SEO: All pages must have unique meta title, meta description, and OG tags.
- Accessibility: Basic WCAG compliance — alt tags on all images, readable font sizes.
- Browser support: Chrome, Safari, Firefox, Edge — latest two versions.
- SSL certificate: HTTPS required.
- Analytics: Google Analytics 4 and Google Search Console must be integrated.
- WhatsApp API: Must use official WhatsApp Business API — not informal redirect links for automation.

DELIVERABLES

- Fully functional, deployed website with all pages listed above.
- Admin panel or simple form for receptionist to enter patient treatment data.
- Automated WhatsApp reminder system connected to patient records.
- Google Business Profile setup for all three clinic locations.
- GA4 and Search Console linked and verified.
- All pages SEO-ready with meta tags and local schema markup.
- Handover documentation for receptionist on how to use the patient entry system.
